

**WELCOME NEW AFFILIATE MEMBER****METAL LINE PROJECTS (PTY) LTD**

Joined May 2018

Chris James  
Director

**What motivated Metal Line Projects (Pty) Ltd. to join ICDA?**

*Exposure to a global industry base including but not limited to producers, traders, logistics and product specialists. Our business demands we remain at the forefront of the industry which requires extensive market knowledge, coupled with strong relationships which we strongly believe the ICDA provides the necessary platform to do so.*

**What do you expect from your ICDA membership?**

*Opportunity to engage with new and existing colleagues, to develop our business and ourselves as individuals who are globally connected and educated. Accurate insight into the market both locally and internationally which we feel is lacking at times based upon alternative sources.*

**Brief introduction of Metal Line Projects (Pty) Ltd.**

Metal Line Projects (Pty) Ltd, originating from Johannesburg, South Africa, was established in January 2017 as a boutique supply chain service provider specialising in the exportation of bulk minerals.

With over 40 years combined experience in mineral logistics, mining and legal, MLP is confidently as well as strategically positioned in the market to meet with industry expectations and client specifics. Having been well cemented in the bulk mineral export sector for an extended period, experience enabled us to create a solid foundation for the business to grow from and operate effectively, offering smart logistic solutions ex mine to CIF via both Durban, Maputo and Beira.

Our hands-on approach offers the cargo owner that comfort their material is safely transported, securely stored and efficiently managed throughout. Using internally developed state of the art software, MLP custom designs each solution according to our client's requirements while ensuring all operational and administration activity is correctly streamlined. Sensitive to product quality and operational challenges we enhance our attention to detail with additional cargo management using load for load photographic reporting and moisture samples. Accurate, timeous communication is of utmost importance to us which we believe to be a vital working component contributing towards the success of our business as well as our clients; coupled with accessibility to information we are confident that our systematic disciplines provide our clients with full visibility they require. In turn our explicit understanding of the market allows us to cater to our client's requirements and requests at any given time. Honesty, integrity, commitment and vision are all key elements in the foundation of MLP.

Sustainability, cost effective, market knowledge and smart logistics are the base values of how we strive to continue and remain as one of the market leaders in bulk mineral exports.
