"Collection of chrome related accurate information, its analysis and timely publication. Research of the movement for new institution like REACH of countries and areas in the world and proper action.

Offering and promoting the opportunities of proper communication network that shall be maintained strictly in accordance with antitrust law."

Brief introduction of JFE Material:

JFE Material, 100% subsidiary of JFE Steel Corp, is only one producer of ferrochrome and metallic chrome in Japan. It has been engaged in metal smelting and refining with electric furnaces since its inception in 1917. Using its own technology developed over this long history, we have succeeded in pioneering the unprecedented world of 2000°C in its operations, manufacturing high-purity metallic chrome and special low-carbon ferrochrome for aircraft jet engines and gas turbines for power generation. These products are highly acclaimed, both within Japan and overseas, for their superior quality, and have achieved a firm position in the international marketplace.
