Mt

↑
+1.5 %

Cr ore was up quarter on quarter, remaining in pre-pandemic ranges. Higher prices boosted SA production despite logistics issues and Indian production was back up after a rough H2 2021. Production in Kazakhstan was down on operational issues. Trade figures are dated May 11th 2022 and are liable to be updated as more reports come in.

- 4.3 %

FeCr production was down slightly from the all-time high seen in Q4 2021, but remained above pre-pandemic and 2021 ranges. China registered a slight drop in production due to the Chinese New Year holiday and continued pandemic disruptions. Trade figures are dated May 11th 2022 and are liable to be updated as customs reports continue to come in.
